SNOWSHOES / TRAIL / TREKKING / NORDIC WALKING / SLIDE

TSL OUTDOOR, GO YOUR OWN WAY.

A story of passionate people dedicated to make their playground accessible to anyone. TSL it is 38 years of product innovation, 38 years of sharing experiences, and 38 years of creating snowshoes history in Europe. TSL is the reference snowshoes brand and the snowshoes leader on the European market.

We, as a company and moreover as a family, have always worked towards consistent, irreproachable product quality, but also on a close, strong and friendly relationship with our customers.

We've built our company from the ground up in the heart of the French Alps (Annecy-France). The mountains are our natural habitat, our passion, our source of inspiration, and our laboratory. We care about sustainable development and we're aware of how fragile our environment is. This is why we keep an eye on our production and on its impact on the environment by manufacturing our products in the Alps, in France (Snowshoes, Poles, Sleds, Yooner...).

For 38 years, TSL Outdoor's team has been sharing its love of mountains, outdoor life and nature discovering. TSL Outdoor is more than just products, it's a free spirit, a way of life...

Eco-design means designing a product in a way that takes into account the impact it will have on its environment at each stage of its life cycle.

Protecting the environment has always been of primary importance to TSL. Responsible and civic-minded, the company has a close connection to the natural environment in which it is fortunate enough to be based.

FROM DESIGN TO DEVELOPMENT:

From the minute we start designing a product, our aim is to optimise our environmental performance while minimising our impact (consumption of materials, transportation, use, recycling, etc.).

- We try to make it as easy as possible for our products to be repaired. At TSL, we retain all spare parts in stock, meaning we are able to provide an after-sales service for the entire lifespan of your product, whether it's 5, 10 or 20 years.
- We place a particular emphasis on making sure that the packaging for our products is useful and hard-wearing. Take the slip covers for our snowshoes, for example, or our foldable ski and hiking poles, which have been designed with product storage and transport in mind.

With a keen interest in sustainable development from the outset, all our snowshoes, ski and hiking poles (excluding the Hiking Series), sledges and Yooners are manufactured in the French Alps.

Our responsiveness works to the benefit of our clients, with full control over the production process: from plastic injection right through to final assembly. Our expertise, combined with modern production equipment and the innovative production processes developed by our personnel helps us to stay competitive, enabling us to manufacture reliable products through quality controls carried out at each stage of the production process.

WE PAY CLOSE ATTENTION TO:

The amount of energy we consume: We have a contract in place with a company supplying us with 100% renewable energy.

Recycling our production runoffs.

Optimising just-in-time manufacturing in order to avoid any surpluses of unsold stock.

The trust-based relationship we have with our suppliers (95% of which are located within a 100km radius), whether it's for sub-assemblies for our products or for printing our user manuals. We are a part of the local economy, helping to cut down on transport.

THE HUMAN ASPECT:

We have one guiding principle: to come to work each day with a smile on our faces. Togetherness, passion and a commitment to human values are the foundations on which our company is built. Well-being in the workplace is important, but the same goes for quality of life, which is why we strive to pay our production staff above current standards.

That said, we know that manufacturing in the French Alps is not particularly straightforward. At TSL, a family-owned company, we know that our production costs are bound to be significantly higher than costs in other countries. We're not afraid to say it - we're proud to have kept 100 jobs in France, but we couldn't have done it without you, your orders and your loyalty. THANK YOU

Eco-design also means linking up all of the different trades within the company, adding a level of innovation and specialisation.

You can find a short video on TSL here:

When it comes to poles manufactured in the French Alps, we are the only manufacturer to give you the option of designing your own poles.

HANDLES

MAGNETIC STRAP

IT'S MAGIC! With its magical, magnetic, unique and easy to use technology, attaching the wrist strap to the pole is child's play. Don't worry about aiming at the pole; it'll come straight to you. While you're walking it is safely locked into place, so there's no danger of it slipping from your grasp. Finally, removing it is a breeze; just press the button and let go. This is the only Nordic walking glove with a 360° pivot and no index lock, giving you fantastic freedom of movement.

(TSL patent)

Glove with a 360° pivot and no index lock gives you fantastic freedom of movement

A range of handles to choose from:

CROSS

Long EVA foam handle for walking down hill

LIGHT

EVA foam handle

CORK

Bi-material Cork handle

SLIM

Bi-material soft handle

GRIP

optional grip for short handles located on the balance point of the pole

A range of straps to choose from:

ST

An ergonomically designed glove for better grip, comfort and precision. The breathable fabric used and the reinforcement around the circumference make it more effective at withstanding shear pressure while providing enhanced support.

WT

This adjustable and removable strap is also extremely comfortable, making it ideal when it comes to changing positions in order to go up or down.

HANDLES

CROSS

Long EVA foam handle for walking down hill + Adjustable ergonomic strap

LIGHT / ULTRA

EVA foam handle + Adjustable ergonomic strap

CLASSIC

Bi-material polymer handle + Adjustable strap

TIGHTENING SYSTEM

FOLDING SYSTEM

A pole folding system, designed to take up the minimum possible space and extend rapidly. Thanks to both the construction and the perfect cohesion between the different sections, this pole offers excellent resistance and stability.

EXTERNAL LOCK

External tightening technology (magnesium), offering excellent resistance under all atmospheric conditions, as well as a fast and sure adjustment of the poles.

TIPS

all of the tips are made from tungsten, providing excellent grip and great durability.

A range of tips to choose from:

SWING

System permitting: baskets can be angled by up to 20° to adapt to the terrain.

Poles come supplied with Ø55 and Ø85 baskets and the Crossover end piece.

PUSH & PULL

A Patented system, for fast and easy basket mounting and removal.

Poles come supplied with Ø55 and Ø95 baskets and the Crossover end piece.

TWIST

Rotation system used to change baskets.

Poles come supplied with Ø55 and Ø85 baskets and the Crossover end piece.

SHORT

STANDARD

SPIKE

WINTER SPIKE

CROSSOVER PAD

(TSL patent)

Straight or bevelled tip fitted with a washer. Poles supplied with Crossover pads.

CROSSOVER PAD CONCEPT

The Crossover Pad adapts to the obstacles you face throughout your walk to provide extraordinary traction and support, whatever the terrain. 8 multi-crampons adjust their shape upon contact with the ground, hugging the surface and giving you the grip you need.

ADDICT RACE SERIES

ADDICT RACE CARBON/ALU 2

190 > 215g x2 / 0,42 > 0,47lbs x2

Ø 16/14

70,5 > 140 cm / 27,6 > 55,1"

Are you crazy about ski touring?

Then the ADDICT RACE poles are ideal for you! You'll love their carbon / alu structure, the Magnetic System strap, their "Winter Spike" tip and their feather lightness!

Model presented : ADDICT RACE CARBON/ALU 2 GRIP ULTRA WINTER SPIKE

WINTER SPIKE

This tip has a specially designed basket, and offers several advantages:

- A bevelled tungsten tip for extraordinary grip on icy snow.
- An optimised shape to eliminate balling.
- The basket is set lower than for other tips on the market for a perfect release.
- Improved travel and incline, thanks to the specialised basket shape.
- Good support in deep snow.

PUSH&PULL

Instinctively change the position of your hand on the handle and supports for:

- Safe and effective grip
- Natural and powerful support for the edge of your hand, thus avoiding needless gripping of the handle
- Energy saving both rising and falling while providing maximum power

Ergonomic, EVA foam handle without indexing guaranteeing the MOVE's excellent power / comfort relationship.

Detachable Strap:

- Prevents loss of the poles on steep slopes
- Secure, instant unclipping in the event of a fall.

The «Move» is devoid of a standard strap in order to have no compression and so, no bad blood circulation.

KIT CROSSOVER

Suitable for most poles on the market

- This CROSSOVER tip adapts to the changing terrain throughout your walk, no matter what sort of ground you're covering.
- Say goodbye to noisy tip impacts: this is ultra-quiet
- It offers great grip, thanks to the 8 spikes which flex upon contact with the ground
- It helps protect walking paths, unlike normal spikes which can erode stony soil
- No risk of injury, unlike traditional tips.

TSL SNOWSHOES SERIES

All snowshoes of this classic range have been designed and developed for each type of consumer to find the pair corresponding to their specific use. They are made entirely in France with TSL in total control of our production (plastic injection to final assembly) ; This ensures high quality products as well as superior after-sales service.

THE IMPORTANCE OF THE FRAME SURFACE.

You should choose the deck size according to your size and the snow conditions. The greater the weight of the walker, the wider the deck required to bear the weight.

All of our adult frames (Highlander, Hyperflex, 3D design, classic) are available in a range of sizes.

natural
walk

All of our narrow-waist snow-shoes have been tested in the most extreme temperatures. The special shape (TSL patented) enables you to maintain a normal gait.

HIGHLANDER

>> High-tech design and grip

The Highlander models will impress you with their high-tech design, their durability and their high levels of grip on all types of snow (crusted, wet, icy). The high-tech bindings on these frames make them ideal for those of you looking to venture off the beaten track in pursuit of steep inclines.

TECHNOLOGY

ROCKER

The purpose of the rocker is to cushion your step, helping to guide the foot through the walking process, whether on flat surfaces or inclines.

FRONT GRIP

A sharp, multi-tooth grip for maximal traction on steep inclines. Made from stainless steel, it is sure to stand the test of time.

LATERAL GRIPS

The interchangeable grips located around the edges of the frame provide excellent grip on all types of snow. The 3D design and hourglass shape help prevent you from slipping while going up, while providing enhanced grip for downhill sections.

STRUCTURED FRAME

The structured frame and the crossbars help guarantee control and traction on soft and compact snow.

CONTACT GRIPS

A TSL patent, the composite teeth beneath the rear rocker of the snowshoe cut and expel snow, ensuring enhanced grip for downhill sections.

CRAMPONS

Whether on flat or inclined surfaces, initial contact with the snow is made using these 2 two-way, stainless steel crampons or tips positioned beneath the base of the foot.

THE FRAME

HYPERflex concept

Hyper-flexible and lightweight with an ergonomic binding, the Symbioz adapts to the unevenness of the terrain to give extraordinary traction. The inserts provide elasticity and responsiveness and to offer a feeling of freedom.

>> Performance and comfort

HYPERFLEX FRAME

This frame allows a totally natural foot movement for absolute walking comfort (TSL Patent)

FRONT TEETH

The front teeth provide maximum traction on steep slopes.

stainless steel
Alpine Style
CRAMPONS

ANTIBOT PLATES

They enhance the claws grip.

CLAWS

The 8 independent, abrasion-resistant stainless steel crampons (similar to mountaineering crampons) are always located under the foot's pressure points, no matter the size of your foot. They grip is unbeatable.

VERTICAL BLADES

The vertical blades provide superb traction and control on inclines or steep slopes in soft or compact snow.

REINFORCEMENTS

For the first time, TSL has used a design containing reinforcements each having their function that are essential to the effectiveness of the Hyperflex concept. They support the product's distortion constraints during walking and give the Symbioz its overall qualities: flexibility, rigidity, elasticity and light weight.

CARBON FIBRE COMPOSITE

Carbon fibre composite reinforcements store energy during the flexing phase and restore it at the end of the stride to increase stride power and reduce effort and vibration. Distortion of the **SYMBIOZ ELITE** and **SYMBIOZ ADJUST** frame is progressive, responsive, precise and uniform in both the bending and twisting phases.

GLASS FIBRE COMPOSITE

Glass fibre composite reinforcements support the **SYMBIOZ ACCESS**, **SYMBIOZ ORIGINAL** distortion constraints to provide a natural stride in both the bending and twisting phases.

TEXALIUM

Texalium reinforcements, like carbon fibre, support the Symbioz' distortion constraints. They allow effort to be transmitted evenly across the whole frame to provide a natural stride in both the bending and twisting phases. They give the **SYMBIOZ STEP-IN** a high level of elasticity for harmonious suppleness and excellent stride absorption.

THE FRAME

GRIP SERIES

>> Grip

These decks benefit from variable height edges providing better grip on downhill slopes and great traction in all types of snow (TSL Patented).

Icy snow

Packed snow

Soft snow

**STAINLESS
STEEL
GRIPS**

The 3D Design snowshoes use 6 interchangeable tips (8 for 418/438) and front points for excellent grip. The Grips models, fitted with lateral stainless steel blades, optimise the grip on these models.

COMPOSITE SERIES

>> Ease of use and flexibility

These robust and rigid frames are perfect for treks on gentle slopes. They are fitted with 6 interchangeable crampon tips and front points for very excellent grip.

Packed snow

Soft snow

BINDINGS

GLOBAL MEMORY FIT BINDING.

TSL is the only brand of snowshoes to provide a complete memory of the shoe (size and front volume). This gives excellent control of the foot across a wide range of sizes and in all types of situations. Once these pre-adjustments have been made, the snowshoe can be put on easily and quickly before each outing.

GLOBAL MEMORY FIT BINDING

DEVICE WITH PRESET MEMORY

LOCK ADJUSTMENT (TSL Patented)

Just activate the locking system and slide the heel support to the correct position. It will now maintain this setting.

DEVICE WITHOUT PRESET MEMORY

RAPID ADJUSTMENT

Quick shoe size adjustment by simply pushing the heel piece.

FRONT TIGHTENING

BOA® FIT SYSTEM

BOA®

The Boa® Fit System wheel system helps distribute binding in a precise, uniform way, thus reducing the pressure points at the front of the foot.

MEMORY LOCK SYSTEM

(TSL Patented)

Volume memory, with a final buckle to tighten it onto your foot.

STRAP TIGHTENING

Front classical tightening with strap.

MEMORY FLEX SYSTEM

(TSL Patented)

Flexible volume memory with a lateral pre-adjust.

LATERAL ADJUST

(TSL Patented)

Lateral adjustment to fit perfectly to your foot and memorise its volume.

BINDINGS

BACK TIGHTENING

ANKLE PRE-ADJUST

Enables you to centre the comfort strap on your instep and permanently set its position.

BUCKLE TIGHTENING

Our bindings include a ratcheting buckle system.

COMFORT STRAP

Enables you to optimise the contact zones around the ankle strap, providing improved comfort and support.

HEEL LIFTS

Adaptable to any foot size, our climbing bars offer an average angle of 12° and are always located right under the heel. Because there is no direct contact with the shoes, pressure points are non-existent.

Going uphill, the device lifts the heel. Going Downhill, the back of the binding goes under the deck in order to keep the foot flat, preventing the foot from jutting out at the front of the shoe.

CLASSIC

All TSL snowshoes have a Sound and shock absorbing System (TSL Patented).

HIGHLANDER adjust

>> High-tech design and grip

Effective grip and comfort are guaranteed with the Highlander Adjust. Highly effective on even the steepest terrains, with secure foot hold through precise, uniform binding.

RACING

The Symbioz Racing has been specially designed for high-speed snowshoe enthusiasts. Their extreme flexibility offers a completely natural feeling stride, fantastic weight transfer and unparalleled lightness (330g/0.70lbs per foot), making these snowshoes a natural extension of your body.

**Stéphane RICARD
SNOWSHOE WORLD CHAMPION**

This model complies with both European and American standards for snowshoe racing.

NATURAL STRIDE

The Hyperflex Concept frame gives you a completely natural foot-strike and propulsion, ensuring that your stride is as natural as possible for maximum grip on both your snowshoes and the snow. Thanks to its shape memory, these snowshoes store energy when flexed and release it at the end of your stride.

TRACTION

Great grip, 4 inter-changeable tips, traction bars. Mobile, 3-position rear crampons for optimal heel support.

TRACTION on soft snow

Contact Grip - TSL patents

The composite teeth located below the tips cut and expel snow in order to boost traction when the foot first comes into contact with the ground.

Traction is thus reinforced, followed by the crossbars located beneath the frame.

SYMBIOZ

hyperflex racing

>> Performance and comfort

Tighten and loosen your snowshoes in a flash with pre-set adjustments which stores the memory of your foot: pre-adjust the length, the toe and the heel + the tightening strap and slip them on effortlessly.

comes with a tightening strap for hard-core fans of the ankle-strap.

A sturdy ground-level sled for maximum excitement. Specially for big people!

70 x 43 cm / 27,5 x 17"
360 g / 0,80 lbs

YOONER ENDURO

The Yooner lets you sled down a slope sitting comfortably on a seat mounted on a spring and to turn corners by simply rotating your shoulders, the handle insures great balance. The Yooner's key advantage is that it's easy to handle, great fun and immediately exciting.

The Yooner is for all ages and anyone who wants to share in an easy, fun activity. It's also a way of bringing skiers and non-skiers together and bringing more variety to life in the snow!

Already more than 60 ski resorts in France allow the Yooner on the slopes! If your ski resort does not yet allow the Yooner and you want to offer it to your customers, please contact our Promotions Service (tsl@tsloutdoor.com) for France or the TSL distributor in your country.

yooner.com

YOONER ENDURO

The Yooner Enduro, which is easy to handle, light and comfortable thanks to its suspension, is also fitted with a genuine carved ski, letting you tackle all snow types. Take it with you wherever you go!

TSL'S CUSTOMER SERVICE

At TSL, our main goal is the user's satisfaction throughout the product's lifespan. For this, we do everything we can to maintain and improve the quality of our Customer Service Department.

From the design of our products by insuring the parts can easily be replaced.

By guaranteeing proximity and responsiveness of care thanks to our French production.

By offering a 2-year guarantee (parts and labour) and also providing a 10-day repair service.

By providing all our retailers with a Customer Service Department catalogue and details of repair procedures.

ACTIVATING THE GUARANTEE:

We give our consumers the option of registering their products on our website to facilitate the implementation of their guarantee, to find out about new products and features and to benefit from improvements to our products.

TSL NETWORK

Development of the activities and services offered is important at TSL:

Full information on our products, the brand and our innovations...

On-line details of marked and secure snowshoe trails in France.

Listing of ski resorts that allow the Yooner on their slopes.

A Pro space with catalogues, documents, product photos, videos and prices for free download...

TSL: partners or organisers of snowshoe, Yooner, Nordic walking and trail events...

Two Facebook pages + instagram for information concerning the latest news fresh from TSL.
A Youtube channel with explanatory videos and our products in context.
